Profile

GeoSpa boasts a unique experience in developing unsurpassed spa wellness facilities worldwide.

We provide developers, hoteliers, private investors and spa owners with stunning and innovative spa experience zones.

The foundation of our success lies in our team of spa experts. Additionally we pride ourselves in partnering world-renowned architects, designers & spa consultants in the field of spa creation. Together we ensure that the vision becomes a reality.

Using our extensive know-how and well-structured team, we assist in developing facilities that optimise space, provide operational efficiency and enhance the customer experience.

Profile – Our Team

A serious investment in the development of an innovative facility requires the support of an experienced team of specialists.

At GeoSpa our team of spa experts marry experience with talent. The team provides a series of strategic services required at specific points in the project timeline.

We use well established methods to ease communication with the site appointed project team.

Our Creative **Design & Technical Team** will help realise the vision from the project brief, and **our Technical Design & Planning Team** will make it reality.

Profile – Our Markets

GeoSpa has acquired a broad expertise in the development of spa experience zones. This ensures the delivery of high quality solutions for different spa types.

The worldwide growth of the Leisure & Spa industry has meant the evolution of the spa concept. This has resulted in the increased application of spa in many market segments such as hospitality, medical, corporate and many other sectors.

We encourage this growth by partnering world-renowned architects, designers & spa consultants in the different market segments of spa. Together we create new concepts, trends and business opportunities for investors.

The project journey for spa takes many pathways, each defined by the project type and location. Our expertise will realise the pathway through design and technology as effortlessly as possible.

Profile – Our Strengths

Creative Planning & Design of Experience Zones

Design transforms a concept into a luxurious environment. Along with the five senses, GeoSpa also takes into account the sixth sense, perception.

The spa user's opinion will be formed from the moment they arrive. Our aim is always to create a unique and truly unforgettable spa wellness experience.

Technical Design & Planning of Experience Zones

Our Spa Technical Design & Planning Team focuses its attention on the finer details of the project. This results in a superior design, which in turn results in a better performance of the product.

Nine Pathways Approach

GeoConcept

Why create a spa concept?

The spa concept communicates the spa philosophy to the end user. The impact that it generates will strongly influence the spa's ultimate success. It is vital to establish this at the inception of the spa. It is the backbone of individuality for every project.

GeoDesign

What role does design play?

Design transforms a concept to reality. Design communicates the concept to the end user and reinforces the brand appeal.

Along with the five senses, at GeoSpa the sixth sense, client perception is perceived to be the most important. The clients' opinion will be formed from the moment they arrive at the spa.

GeoSpace

Why is spa space planning important?

An integral part of the design process is the attention given to space planning. Space planning must account for the different activities at site. Catering to the different spa divisions such as spa, management, spa team and service maintenance teams.

GeoEquip

How does equipment choice impact the spa?

Our in-depth knowledge of the integral aspects of spa allows GeoSpa to be an expert in equipment selection. Quality design aids quicker installation with a seamless completion to the project. Our specialist product knowledge contributes to the choice of high end and reliable technical and engineering components.

There are many areas of consideration when creating a spa wellness facility. In order to add clarity and give direction to the processes of a spa project, GeoSpa has captured them all in the **Nine Pathways Approach**.

We apply this approach when partnering world-renowned architects, designers & spa consultants.

GeoPromote

Why do promotional & marketing activities ensure the success of the spa?

Having created a spa wellness facility, it is essential to market it correctly to potential clients. GeoSpa can help a successful launch by developing, through partners, strategies to appeal to target audiences using advertising, public relations and media events..

GeoForce

How can a strong team contribute to spa profitability?

The recruitment of a quality spa team is paramount to the success of any project. Your spa personnel will be the face of the spa. They will symbolise the philosophy, expertise and professionalism of the spa

GeoMethod

How does learning empower the Spa team?

With knowledge comes power. GeoSpa's commitment to the ongoing success of every project has resulted in the creation of the E-Spa Institute. This is an online cutting edge learning tool designed to help educate the spa team.

GeoIT

Why is service & support important from GeoSpa?

At GeoSpa we use a well-practised approach to provide excellent after sales and support services on a long-term basis. We pride ourselves on our commitment and ability to underpin all project activities giving our customers a comfort zone.

GeoManage

Why is management is the backbone to the spa?

GeoSpa believes that the growth of a spa wellness facility lies in the hands of the spa manager.

Design By Desire

GeoDesign fulfils the aspirational vision through a complete bespoke service. GeoDesign - Design by Desire offers a choice of experience zones. Each category has products that fulfil the requirements of the desired therapy, environment, mood and ambience. Select from these categories and we will plan the spa.

U Select Size From 3 Predefined Sizes

U Select Colour From Our Colour Pallet

U Select The Features You Desire From Our Features Range

Tropic

Steam Room

Providing the comfort and heat of a humid environment.

Orient

Laconium

A comfortable environment of radiant heat.

Arctic

Ice Cabin

escape to an extreme environment, beneficial to the immune system.

U
d

U Design

GeoSpa offers you U Design and within the U Design portfolio we have six experience zones.

This simple but unique approach allows you to design your own spa area.

We empower you to design and space plan your spa experience zone freely and comfortably as U Design is backed up by all relevant data required for site implementation.

Sahara

Sauna

Inviting dry heat of the desert. Relaxes tension and stress.

Monsoon

Experience Shower

An invigorating aqua indulgence.

Shore

Heated Lounger

To end the spa journey with the ultimate form of reclined relaxation.

Caracalla

Jouvence

Balance

Elements of Spa

Hydrotherapy

Hydrotherapy

CARACALLA – the tub for fully automated underwater massages with the same approach and sequence as hydrotherapeutic massages with underwater jets.

Caracalla offers you up to 20 massage programmes, 10 massage zone groups and individual customized settings for water pressure and programme sequence.

In addition, it also has the Starlight Effect*, a special patented light effect with 147 light spots in eight changing colours. It calms, soothes and gently helps you let go and relax.

A low-noise experience bath tub with a fully automatic, individually programmable health massage for Spa applications & Thalassotherapy.

Health Massage

Massage of 20 body zones from a total of 278 nozzles in 10 massage sequences.

Massage courses with ascending massage pressure applicable and programmable.

Smooth overlapping of the individual massage sequences guaranteeing a harmonic health massage.

Massage individually adaptable for massage pressure, massage zones, massage sequences and treatment duration.

The system is suitable for all current water-soluble and foam-free bath additives.

Noise development of approx. 73 dB(A) during the massage
Fully electronic program control:

Operation by means of an LCD display and menu-supported one-button operation for an easy handling.

In total 20 programs directly recallable, 10 massage courses are individually programmable.

Further possibility of an individual programming of treatment courses (selection of massage zones, sequences, duration and pressure).

Hygiene Systems

Rinsing system for the elimination of used water from optional the air bubble system and the underwater massage system.

Automatic rinsing disinfection according to ÖNORM M 6222-1.

Automatic cleaning and disinfection courses.

Tub Body & Support

Tub is created in an ergonomic body shape with moulded seat, leg wedge and arm rests.

Tub body of seamlessly deep-drawn Acrylic glass (color white) rear reinforced by special laminate.

Base frame made from chrome-nickel steel, height adjustable in order to balance unevenness of the floor.

Starlight Effect (Patented)

Spectacular starlight effects by means of 146 light spots (fibre optics) integrated in the tub body.

Complete illumination of the water because of high luminous intensity of the light spots a total of 8 different colors is available bath in alternating colors or in one constant color possible.

With discreet aesthetics, a clear language of forms and a classic design, CARACALLA establish most versatile treatment possibilities, from the intensive massage to the individually spoiling program. Your guests will brim over with enthusiasm for it.

Caracalla

Whether classic massage, intensive massage or anti-cellulite program: CARACALLA offers 10 available programs to choose from, which can even be adapted to individual zones regarding massage pressure and duration. 10 additional applications can be individually programmed and memorized. An air bubble bath as well as the Starlight Effect with 146 light spots available in 8 rotating colours deepen the relaxing effect

Optional Additional Feature

Starlight Effect (patented)

spectacular starlight effects by means of 146 light spots (fibre optics) integrated in the tub body complete illumination of the water because of high luminous intensity of the light spots. A total of 8 different colours is available bath in alternating colours or in one constant colour possible

Highlight effect

Colour light effects by means of 6 large-dimensioned, in the tub integrated underwater spotlights complete illumination of the water by means of powerful light spots. A total of 4 colours is available bath can be illuminated with alternating colours or one

Technical Data:

Outside dimensions l x w x h: 2360 x 910 x 720 mm

Noise émission: approximatley. 73 dB(A)

Pump Data:

Max. pressure: approx. 5,5 bar

Max. flow rate: approx. 400 l/min

Electrical connection: 230/400V~, 50 Hz, 3,4 kW

Dry Floatation

JOUVENCE – a dry flotation system for all kinds of body wraps: from cosmetic treatments and vinotherapy or thalassotherapy all the way to classic therapeutic applications such as moor mud, fango mud or other peloids.

You lie on a cushion of heated water, and the feeling of floating calms and relaxes your body. At the same time it helps the body wraps develop their maximum effect by enhancing blood circulation and opening the pores of the skin.

The relaxing feeling is further enhanced by the Starlight Effect* with 147 light spots in eight different colours and by the Melody Effect* with programmable music which pampers and soothes the body.

Design and Experience bench for the application of physiologic, dermatologic or cosmetic health wraps in Wellness and Thalassotherapy.

Warm and comfortable bedding on a waterbed surface (completely dent-free) thermal relaxation at constant temperature by means of a Water bath heater and a pack cover easy application of health packs by adjustment of the hardness of the bench for the application of healthy media.

System Components & Equipment

Chassis and surface of the bench: Chassis of CNS with adjustable feet for the height adjustment, including design cladding air core to pneumatically adjust the hardness of the bench water core to relax on the water surface integrated heating elements surface of the bench in hard state almost without pleats and therefore easy to clean removable cover, washable at 90/C, resistant against disinfectants, greases and oils (2 pieces)

Control

An integrated microprocessor control with glass keyboard.

Operation elements for the height adjustment of the bench and for the temperature.

Adjustment indication of the warm water

Temperature integrated control box, splash-proof IP X4

Technical data:

Dimensions (l x w x h): 2362 x 912 x 710 mm
Water capacity bench: 180 liters
Water connection: not necessary
Waste water: floor drain in the room
Filling weight: 340 kg
Electrical connection: 230 V -; 50 Hz, 1,0 kW via FI 0,03 A

Optional Additional Features

Starlight “ Effect

Patented colour light bath:

Spectacular starlight effects by means of 150 light spots (fibre optics) integrated in the device

A total of 8 different colours is available

Treatments in alternating colours or in one constant colour possible

Illumination system:

Integrated light projector with pale-free colour filter and 150 fibre optics

Power of the light projector: 120 W

Colours: magenta, salmon, orange, yellow, blue, turquoise, green, transparent

ON/OFF-switch and colour change located on the tub panel

“Melody” - Effect

System for the sensation of music on the whole body consisting of

Music & Wellness Experience:

complete-body music-vibration massage by transmission of the rhythm of the heard music to the tub body and from there to the bathing water

Music-vibration system:

Vibration module
Amplifier system incl. connection cable for the connection

Aqua Table

BALANCE – oil-massage table combines the treatment options and the bathing rituals of the East and West.

In addition to body wraps, peelings and hot-stone treatments, BALANCE works with oil massages, traditional soap-lather massages and Ayurvedic treatments such as warm oil being poured over the forehead.

In combination with the Starlight Effect*, BALANCE provides numerous treatment options with which heat, water, light and touch can come together to refresh and revitalize.

BALANCE is easy to use and features the thermostat keypad and 6 buttons on the edge of the tub. Since the surface of the table is made of a synthetic material, it resists oil, salt and other massage products and can be cleaned and disinfected easily. At the push of a button, the wet massage bench is lifted on an optimal treatment height.

To relax, regenerate and replenish your strength for the demands of everyday life. BALANCE's technical features are subtly integrated into the design.

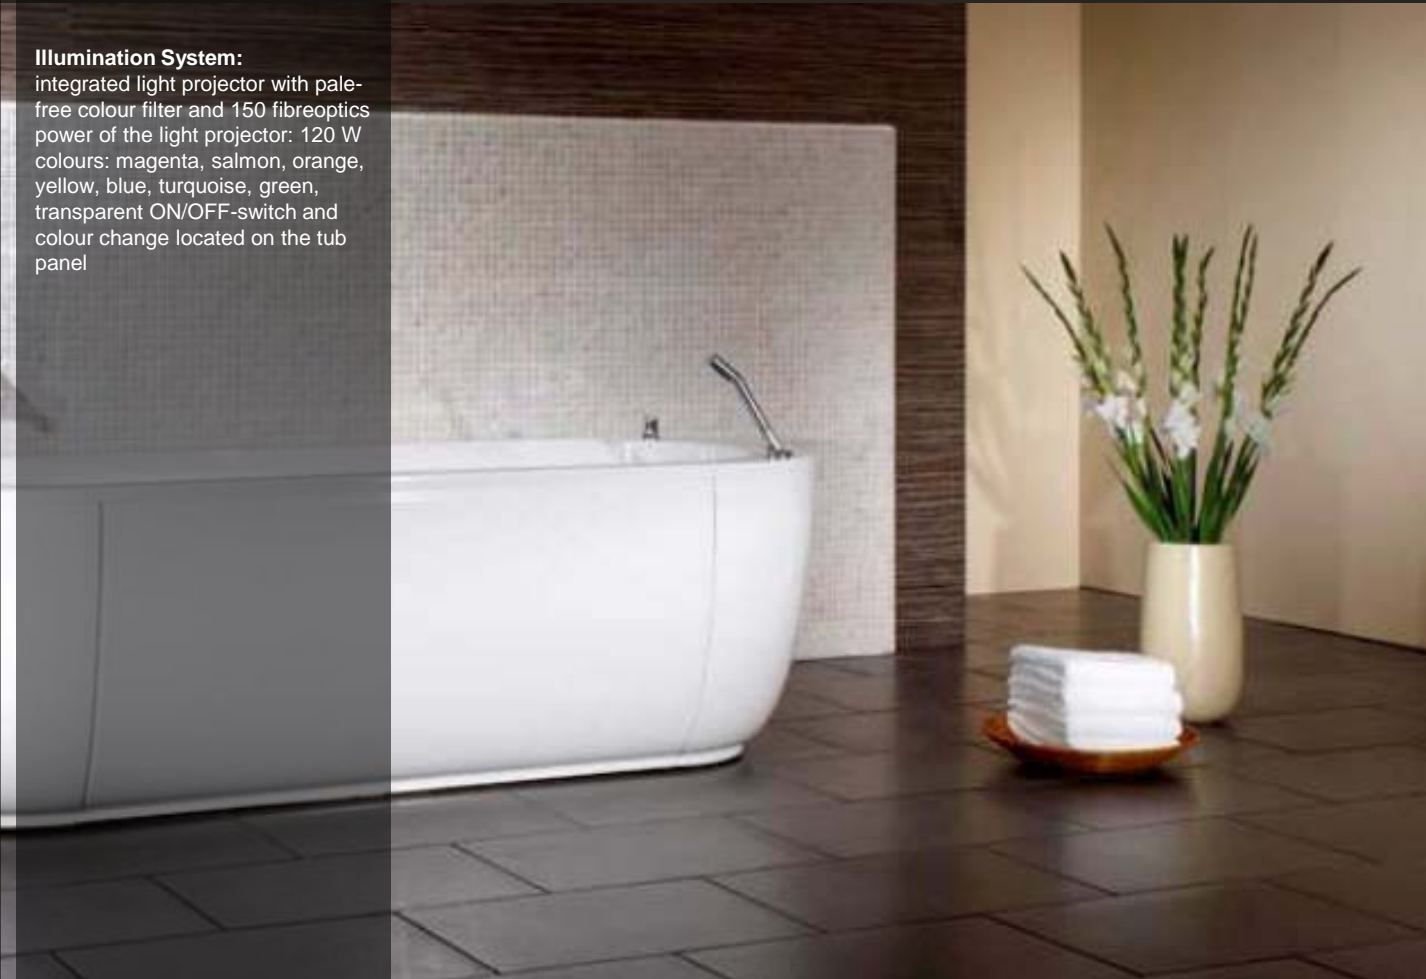

The hand-held shower head is located at the edge of the table, and the water temperature is selected via a thermostat. Lather is created as needed by pressing a button in the table.

The user's head is positioned in a slight recess which features a separate drain for the oil from Ayurvedic treatments in which hot oil is poured over the forehead. The oil runs into a bowl in a drawer and can be removed for easy disposal.

Optional Feature

“Starlight “ Effect
Patented colour light bath:
 spectacular starlight effects by means of 150 light spots (fibreoptics) integrated in the device a total of 8 different colours is available treatments in alternating colours or in one constant colour
 Possible

Illumination System:
 integrated light projector with pale-free colour filter and 150 fibreoptics
 power of the light projector: 120 W
 colours: magenta, salmon, orange, yellow, blue, turquoise, green,
 transparent ON/OFF-switch and colour change located on the tub panel

Technical data:

Outside dimensions l x w x h: 2360 x 900 x 750/900 mm

Electrical connection: 230 V; 50 Hz; 0,7 kW

Bench for the application of wet massages, soap brush massages, Hot Stone or Ayurveda treatments.

Lying surface of plastics including discharge heating of the lying surface with temperature adjustment range thermostat fitting to supply the hand shower

Hand shower set including tube rewriter.

Lateral cladding.

Height adjustment

Electro mechanic height adjustment (maintenance-free) adjustment range approx. 725 - 875 mm

Ayurveda equipment

separate discharge for Ayurveda oils
integrated drip cup for Ayurveda oils

Control unit

Membrane keyboard with display for temperature adjustment

Control keys for lifting and lowering

Control key to activate the hand shower

Elements of Spa

Alpha Experience

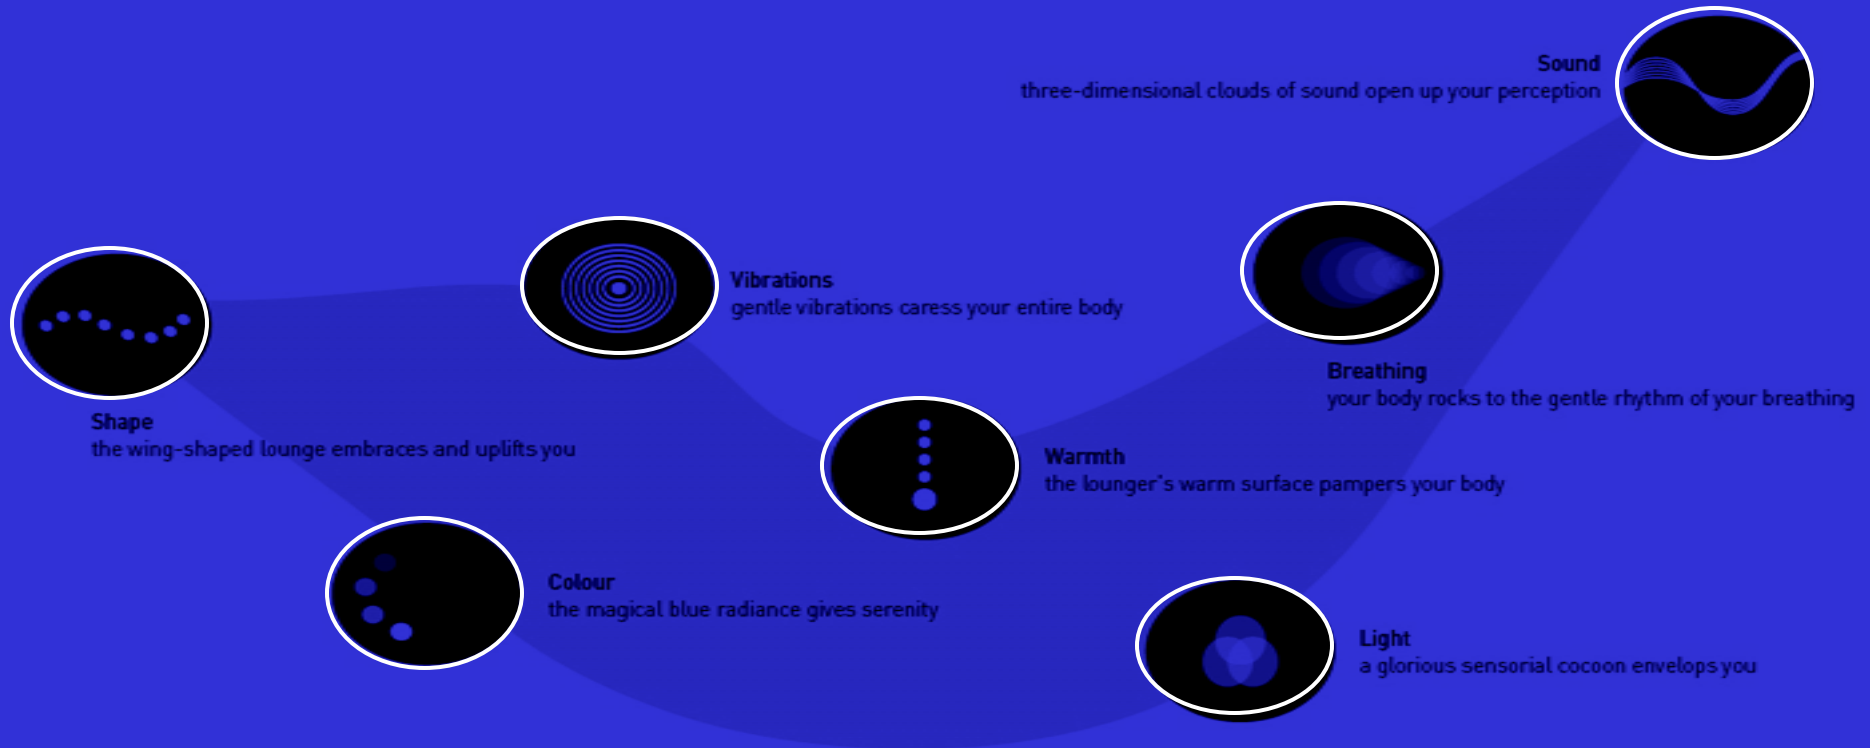

The Alpha Lounger

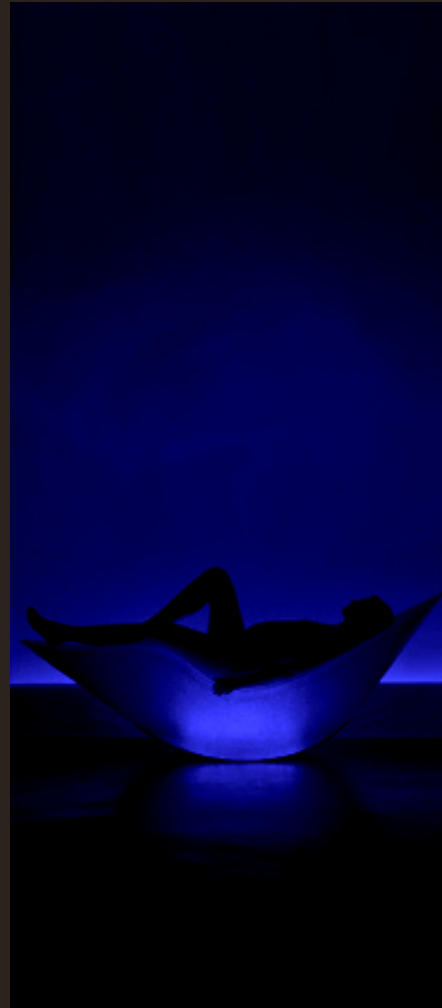

Alpha concept unites art, research and business in an innovative way: As a holistic spa treatment it has established itself internationally in top hotels, day spas and thermal spas as well as in private home spas.

A revenue opportunity model for your Spa - The Alphalounger acts as a stand-alone-treatment.

Multi Sensorial Dynamics Of Inner Space

Program start is either manual or automatic
Requires no previous knowledge
Just plug & play – no installation necessary
Easy to operate

Material - handmade corpus made of fiberglass resin

Alpha Lounger

The ergonomic support ensures full experience of the vibrations.

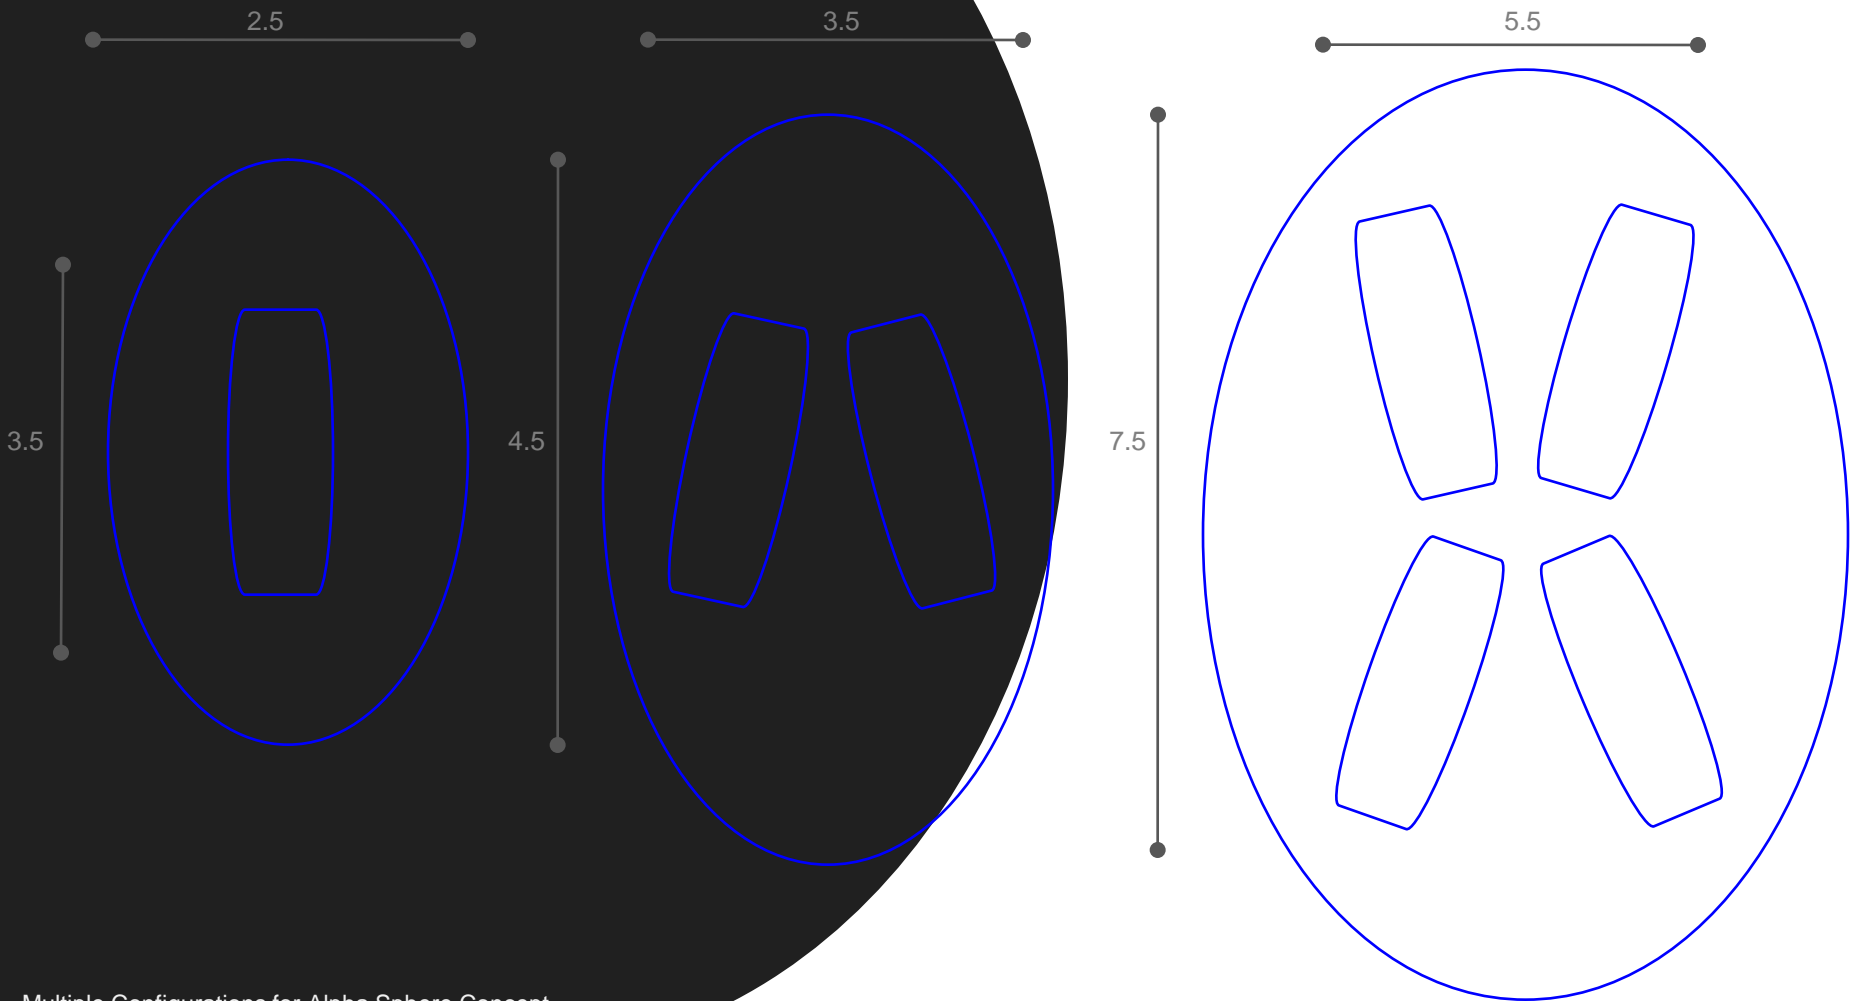

The wing-shaped shape of the lounger warms, lights, vibrates, sounds and softly swings.

An Alpha Experience can be enjoyed for 23 minutes

Effects

- Reduce Stress
- Improve Performance
- Recharge Their Batteries
- Resolve Tension
- Enhance Creativity
- Harmonise Airflow
- Widen Perception
- Lower Blood Pressure

Minimum Required Place For Alphasphere Single: 2,5m X 3,5m

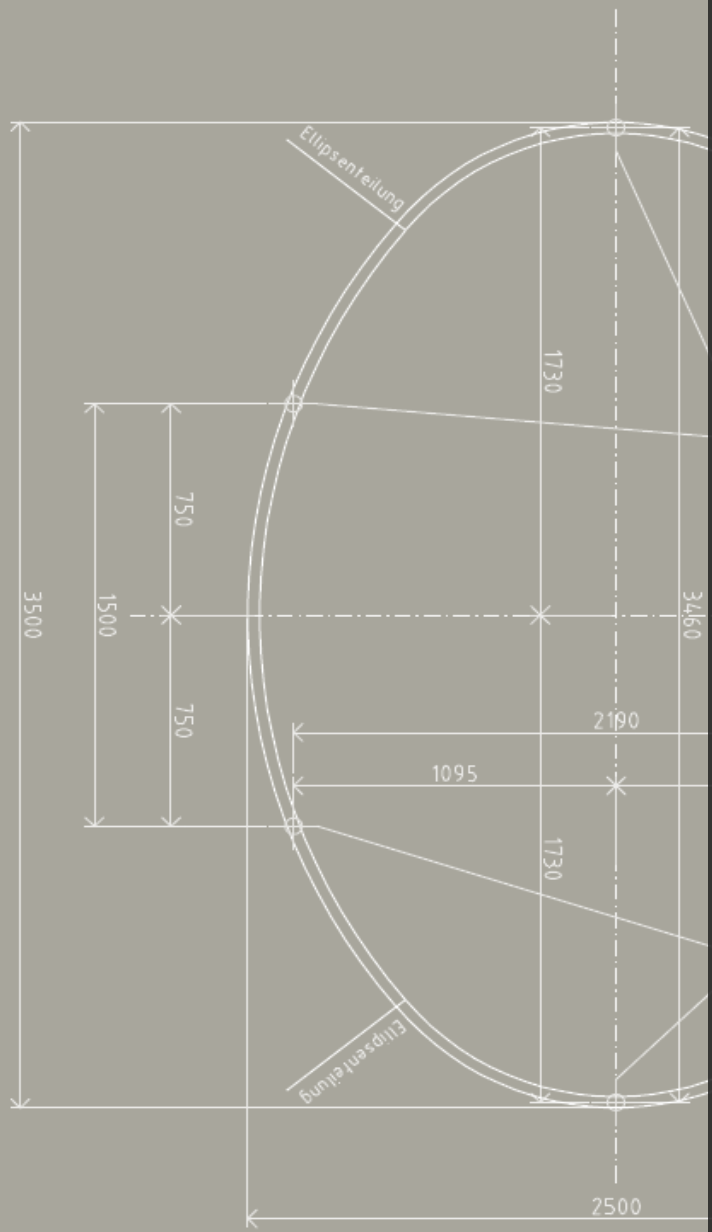

Multiple Configurations for Alpha Sphere Concept

AlphaSphere enhances relaxation
Helps harmonize breathing
Loosens tight muscles
Stimulates skin circulation

Follow-up sessions enhance these effects, providing even deeper relaxation and long-term stress reduction.

The Alpha Sphere

Different perception levels merge into one immersive experience in which our senses are tangible as a unit.

People can disengage from everyday's routine and plunge into aesthetic perceptions.

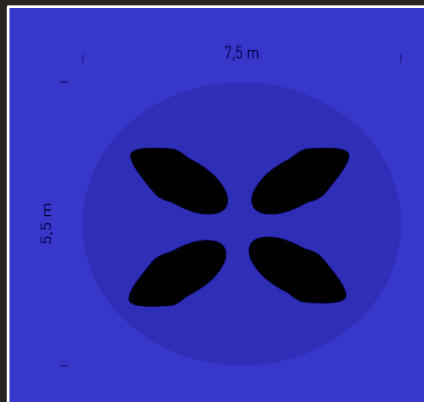

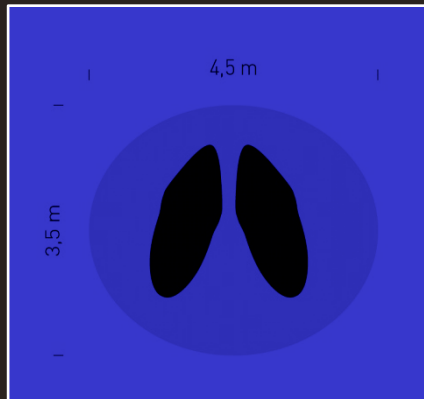

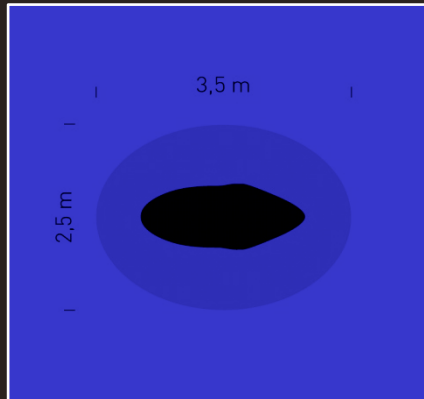

In this process deep archaic consciousness levels get activated and conventional experiences of space, time and "me myself" get transcended.

Due to these effects, AlphaSphere has developed far over the art domain opening new worlds ...

Uniting & Activating The Senses

Alpha Sphere

AlphaSphere Activates and Unites the Senses

Different perception levels merge into one immersive experience in which our senses are tangible as a unit.

Color

The magical blue radiance gives serenity.

Shape

The wing-shaped lounger embraces and uplifts.

Sound

Three-dimensional sound clouds open up the perception.

Light

The glorious sensorial cocoon envelops you.

Warmth

The lounger's warm surface pampers the body.

Vibration

The Soft vibrations caress your entire body.

Breathing

The body swings to the gentle rhythm of your breathing.

Minimum Required Place For Alphasphere Single: 2,5m X 3,5m

AlphaLounger

AlphaProgrammes

AlphaRoom

The AlphaProgramme

The duration of the AlphaProgramme is 23 minutes.

This practically allows using AlphaSphere in half-hour intervals.

The AlphaProgramme starts manually (by pushing a button) or automatically using the additional module Automatisation: In this case, the programme start is time-controlled (e.g., half-hourly) or event-controlled

Uniting & Activating The Senses

Spa Suite

Steam

Sauna

Elements of Spa

Spa Suite

... you are in a private area dedicated to relax: a magical place, designed and created for you, where water and steam, colours and perfumes are everywhere.

A new way to see your wellness, an intimate space, where you can regenerate your body and mind: this is the essence of Sweet Spa®

The ease of a shower and the regenerating strength of a steam bath come together, creating a real SPA in only 2,5 square metres.

Just using the simple touch-screen of Sweet Spa®, the delicate touch of water will restore your body, whereas the warm steam will naturally remove impurities.

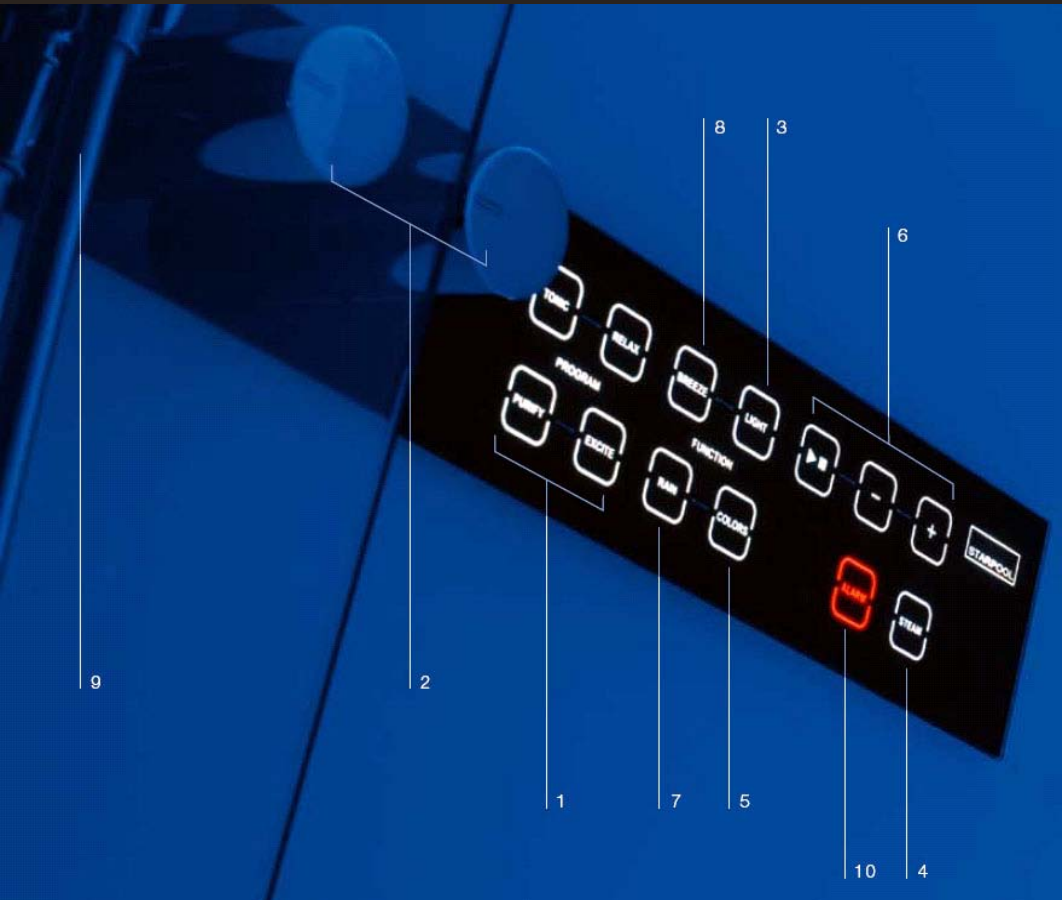

Stress will leave you, colored lights will regenerate your mind and your breathing will benefit from natural essences.

Every day you will live your Sweet Spa® in a new way thanks to its different functions: "Breeze" (breezed cold water, mixed to cold mint aroma and a delicate blue light) and "Rain" (warm water, together with an amber light and maracuja essence).

Or you can choose one of the four programs (Relax, Tonic, Purify, Excite) which, with the addition of a cosmetic product, will turn your Sweet Spa® into the ideal self-treatment place.

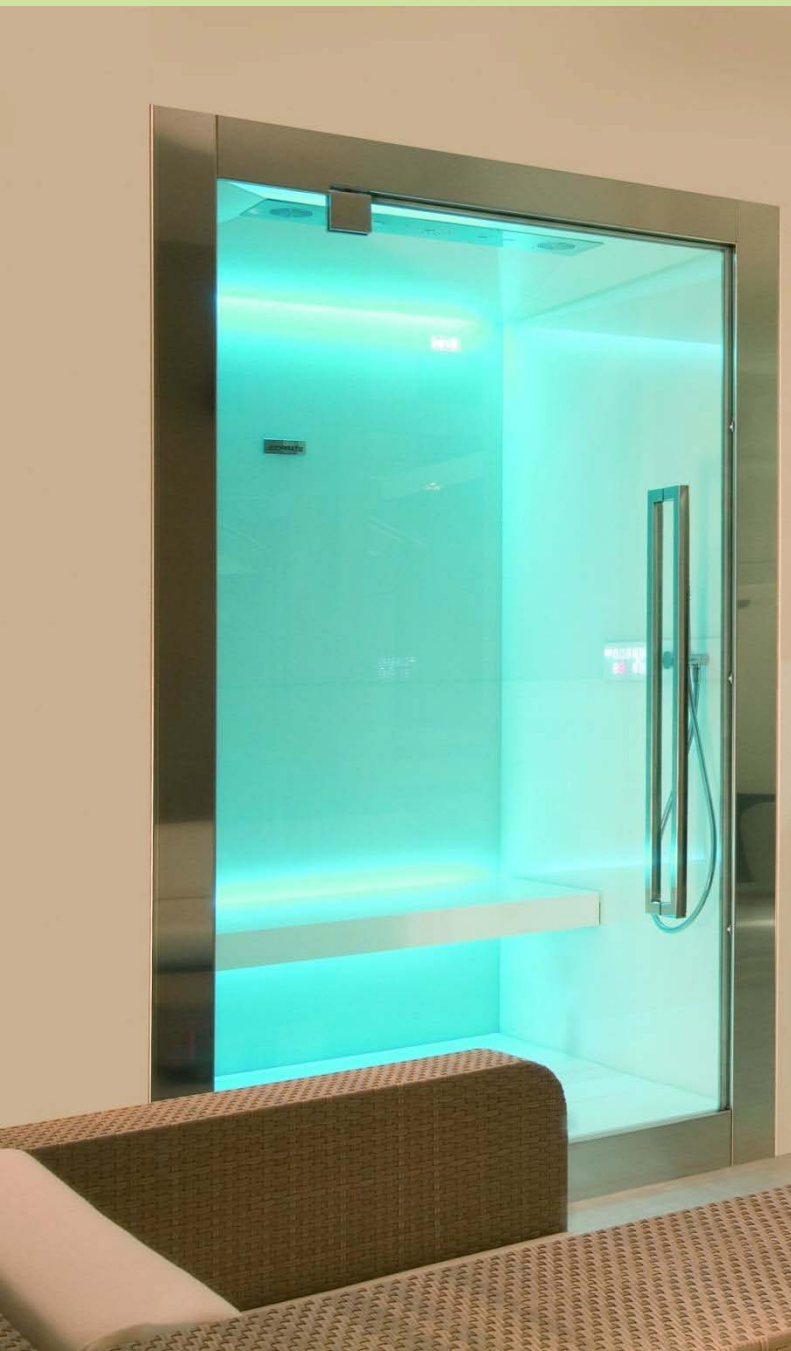

Luxury Sauna & Steam Experience @ Home

1. PROGRAM Relax - Tonic - Purify - Excite, 4 self-treatment program
2. MIXERS for the temperature and the water flow of the shower
3. LIGHT basic light
4. STEAM intense bath of aromatic steam
5. COLORS activation of color rotatio

6. MUSIC activation and regulation of the music
7. RAIN warm drops – amber color - maracuja essence
8. BREEZE breezed water - color blue - fresh mint essence
9. Ceiling SHOWER and wall shower head
10. ALARM stops of all functions in the cabin and power disconnection

WALLS

Exclusive and state-of-the-art materials guarantee long life and solidity to Sweet Spa® by Starpool, while the wide choice of finishings gives it a design which is suitable for any environment.

DOOR

The wide window insulates the inside of Sweet Spa®, creating a quiet area.

FRAME

The chromed and light elegance of the finishing makes your space more precious

TOUCH-SCREEN

An easy control panel allows you to move quickly and simply through the different functions and programs.

SUSPENDED BENCH

Up to two people can live this regenerating experience together with one of the many programs available.

LIGHTS

The lights of Sweet Spa® add the benefits of the use of colours to every treatment.

OPENING

The big, ergonomic and essential handle guarantees a comfortable hold and gives Sweet Spa® a further touch of personality

Relax

Stress melts away, defeated by the relaxing strength of blue, by relaxing sounds and the stimulating smell of a body compress.

Cradle in the soft caress of water, awakening with renewed lightness and serenity, which will be everlasting thanks to the delicate citrus lotion.

Tonic

Recharge your body quickly with vigorous music and the harmonious influence of green.

Spoil yourselves with fresh and sharp aromas, an aromatic scrub will prepare your skin to receive all the strength of water, to regenerate your body, mind and spirit.

Purify

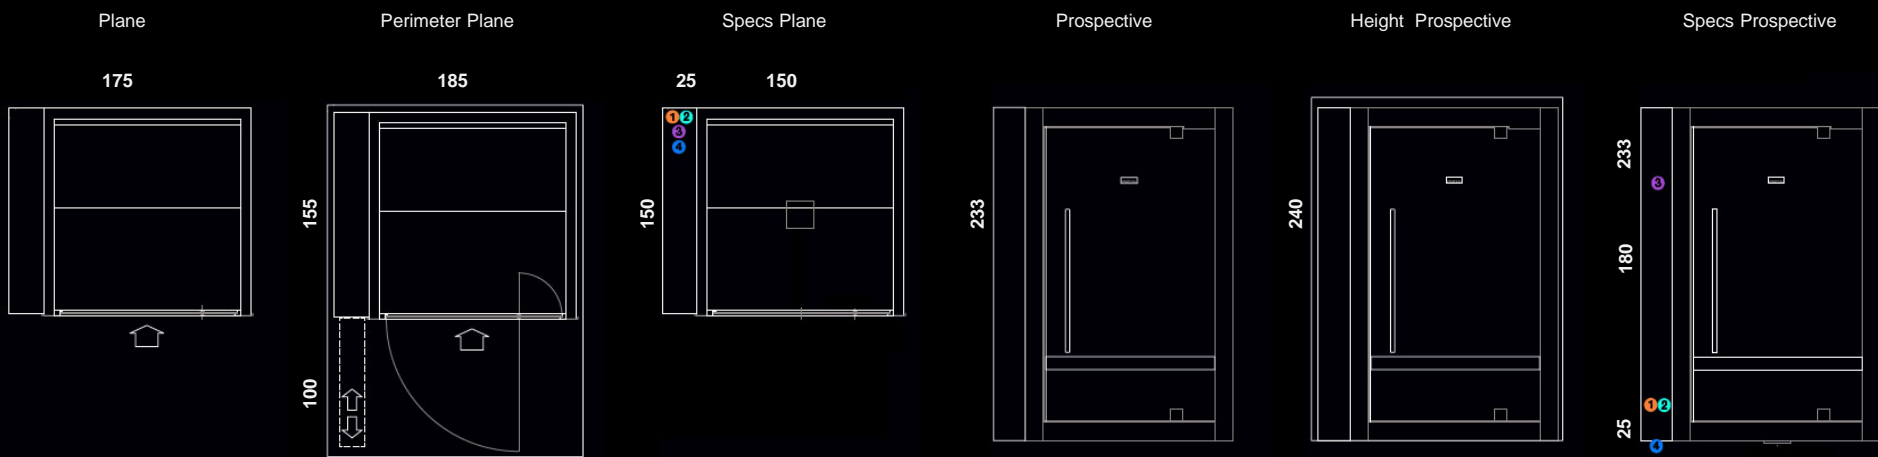

Make a gift to yourselves with a special journey, where your skin and body will find their wellbeing and stability, stimulated by stabilizing sounds and by a yellow light: beneficial mud will absorb your toxins and impurities, which will then be removed by delicate rains. A spicy lotion ends this program, nourishing and hydrating your skin

Excite

The unstoppable energy of red, sensual smells will take You in a reinvigorating and stimulating journey: body and mind awake, stimulated by a series of water steams and fresh rain, whereas the scrub deeply cleans the skin, setting it free from impurities: this is an experience which donates new and lasting energies

Keys

- 1 Cold water line - pipe diameter 1/2" - h 25 cm - female connection with sphere tap.
- 2 Hot water line - pipe diameter 1/2" - h 25 cm - female connection with sphere tap.

Minimum room size for delivery: 80 x 200 cm

Dimensions: 175 cm x 150 cm x h 233 cm
 Weight: 800 kg
 Tension: 400 VAC 3L+N+PE (standard) 230 VAC 1L+N+PE (requested)
 Consumption: Max 3 kW
 Necessary water conductivity: from 125 to 1250 microsiemens/cm 20°C
 Ideal water conductivity: from 500 to 800 microsiemens/cm 20°C
 Ideal hardness of water: from 5 to 10°F

In the kingdom of light. Thanks to the white walls in white back-enamelled glass, Sweet Spa® becomes fully coloured, and creates real light baths, which are particularly exalted by the Steam function.

Staves and bench in Korakril® make it more precious, as it is resistant, hygienic, antistatic and won't be damaged by the light.

The cabin is made in Alulife® which, thanks to a special elaboration, allows the aluminium to come to life, turning it into a warm material, whose value increases thanks to embracing lights.

The staves and bench in Korakril® complete it, as they are resistant, hygienic, antistatic and won't be damaged by the light.

You will live an unforgettable experience in an exclusive space. The walls of Sweet Spa® come to life thanks to the natural stone, a design element and a further touch of character.

The light fades away softly on the refined Eramosa marble spreading uniformly on the bench and floor in Korakril®.

CRYSTAL

Elements of Spa

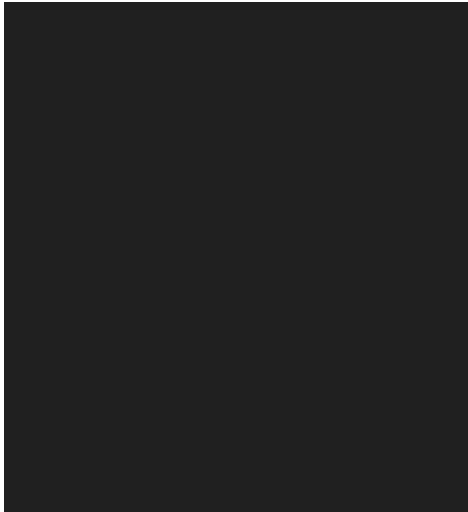

Hydro Pool

The pool is in two halves - one static half contains the air-bed and steps with the lighting unit.

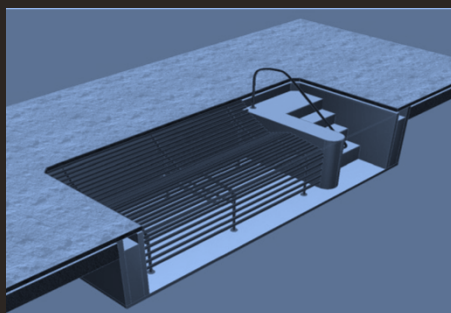

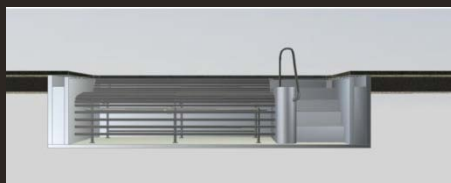

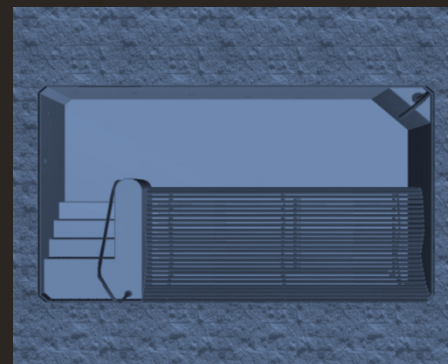

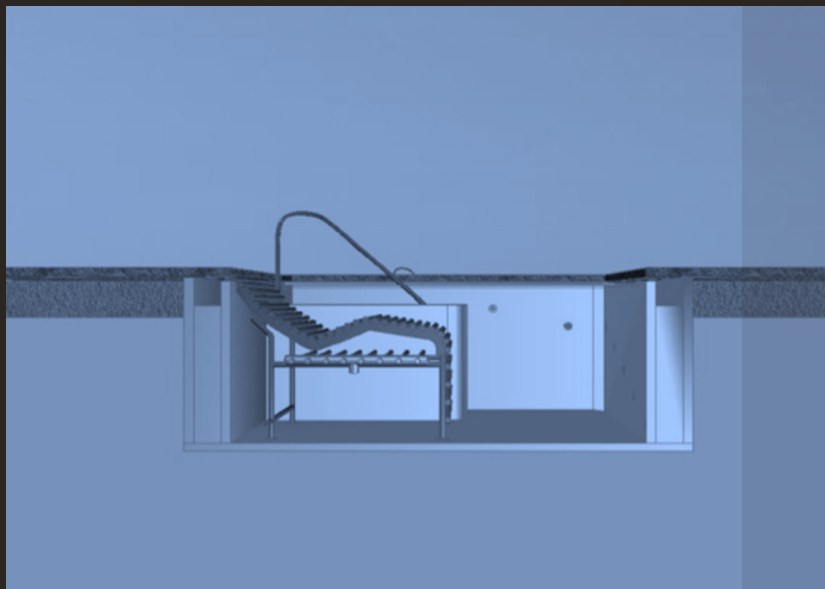

The flexible section is removed to indicate the static arrangement.

The other half can be varied as required.

The Hydro-Pool

In essence, the Swiss Compact Hydro provides a luxurious bathing experience for 6-8 people. It is an ideal solution for separate gender spa's and provides the flexibility for designers to choose location, indoors or outdoors.

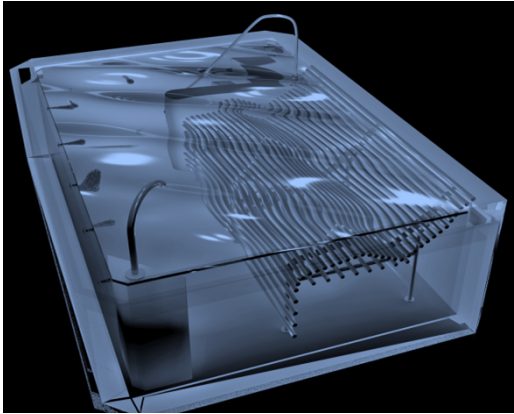

Swiss Compact Hydro

The Swiss Compact Hydro is manufactured to a high design standard.

Due to its clever construction format, it can be delivered to site in two fully formed sections which makes installation a simple process.

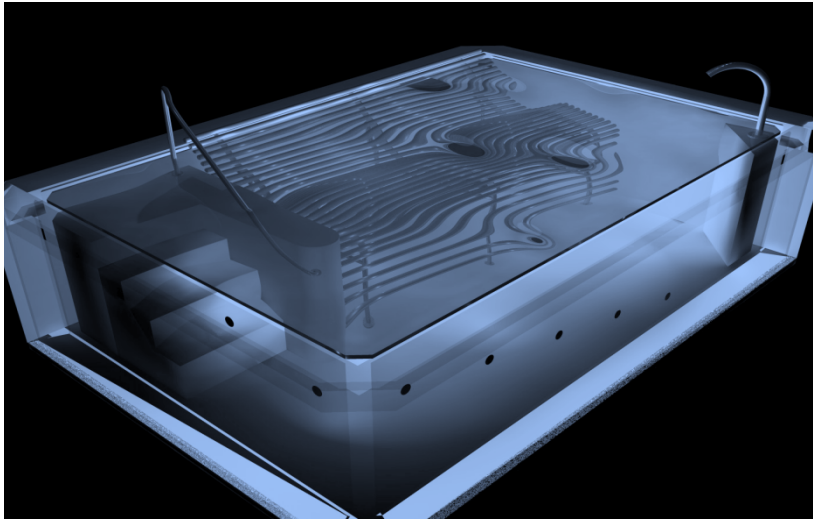

Also thanks to its unique design, customers benefit from the flexibility of choice of locations within the Spa environment in which it can be placed.

This means that the delivery, site installation and commissioning of the Swiss Compact Hydro is quick and easy.

Cut-away of the pool trunk indicates the location of the attractions

Single or double neck massages can be located to corner positions.

The flexible section shown in cut-away demonstrates the recommended locations of body jets.

Client requirements can easily be accommodated. Variation to the shape of the pool on this half will allow for curved or angled sections depending on site conditions and container restrictions. Edgeless or infinity edge could be options.

Section One:

The Swiss Compact Hydro has a static air-bed allowing the user to relax and recline with due consideration to ergonomic safety. Steps and a hand rail ease entry into the pool and the steps have lighting to further ensure safety.

Section Two:

The Swiss Compact Hydro has the flexibility of being able to add a choice of features. Single or double neck massage heads can be incorporated in the corner of the Swiss Compact Hydro to further enhance the bathing experience. If desired, up to ten further body jets can be added at a location of the customers choosing

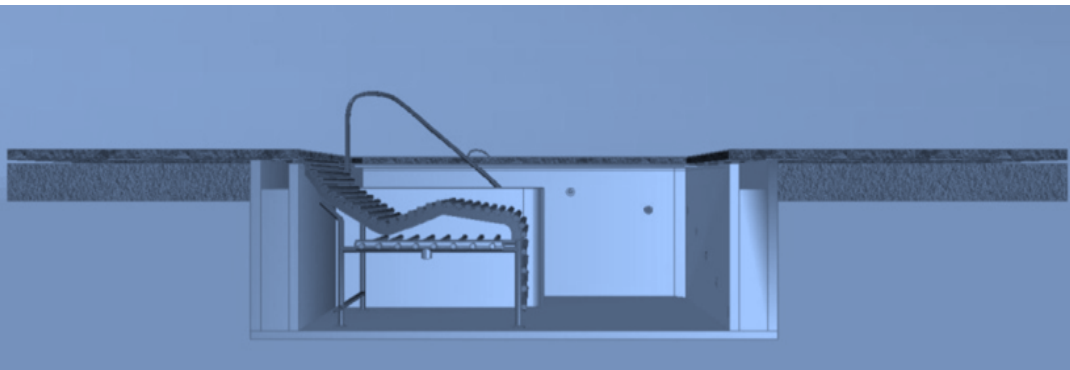

Example installation with deck surround and pergola

All rails and features are within the pool area.

Continuous water skimmer and over flow is under the deck surround.

Swiss Compact Hydro

Weight Kilos	3,940

Client Care

Site Support

Our attention to detail works to achieve a superior design, which in turn results in a better performing end product.

This level of attention extends throughout the project from concept, completion and beyond.

GeoSpa's mission is to help maintain a high level of site care, ultimately contributing to the success of the spa wellness facility.

GeoSpa has implemented SAAS (Software as a Support). SAAS works to ease communications, proactively forecasting project needs in advance.

It also provides an overview of the service and performance of equipment after installation.

This ensures that our clients are fully informed of every aspect throughout the duration of the project. SAAS is valuable empowerment tool for multiple site projects.
