# SPA, WELNESS & POOL LINEN

Our approach to the SPA world places a strong emphasis on bespoke design, where our close collaboration with our customers and their designers is a decisive factor.

We aim at creating products designed not only with aesthetics and brand consistency in mind, but also with a strong focus on their specific function and use.

Therefore, our projects are fully tailored, and often include items designed for the specific services and treatments provided by each individual SPA, such as special massage and manicure cushions, body wraps, paraffin gloves.

Besides towels in all the required sizes and bathrobes, we create complete treatment bed setups, specially made for each bed shape and size.

For pools, we manufacture custom-made towels even in extra-large sizes and bespoke models of lounge covers.
